

Sandeep Hari

JUNIOR SOFTWARE DEVELOPER (.NET / FULL-STACK)

OBJECTIVE

To obtain a Junior Software Developer role where I can apply my experience in full-stack development using C#, ASP.NET Core MVC, SQL Server, and Azure to build scalable and reliable business applications. I focus on writing clean, maintainable code and improving system efficiency, data handling, and workflow automation

SKILLS

Backend:

C#, ASP.NET Core MVC, REST APIs

Frontend:

JavaScript, Razor (CSHTML), AJAX

Database:

SQL Server, Entity Framework Core, LINQ

Cloud:

Azure (App Service, Azure SQL Database, Cognitive Search)

Concepts:

OOP, Authentication & RBAC, System Design, Database Design, Testing

EDUCATION

IIE Varsity College

- Bachelor of Computer and Information Sciences (Application Development) - 2025
- Higher Certificate in Mobile Application and Web Development - 2022

PROJECT EXPERIENCE

Full-Stack Developer (Academic / Project-Based)

2022 – Present

- Built full-stack web applications using ASP.NET Core MVC with authentication, role-based access control, and workflow automation.
- Designed and managed relational databases using SQL Server and Entity Framework Core with optimized LINQ queries.
- Developed RESTful APIs and responsive front-end interfaces using Razor (CSHTML), JavaScript, and AJAX.
- Deployed applications to Microsoft Azure (App Service, Azure SQL Database, Cognitive Search).
- Applied unit testing, validation, and structured error handling to ensure reliable application behaviour.

Contract Monthly Claim System (CMCS)

- Built a multi-stage approval system to automate contractor claim processing.
- Implemented role-based access for Lecturer, Coordinator, Manager, and HR.
- Developed workflow automation and reporting features for claim tracking.
- Tech: ASP.NET Core MVC, C#, Entity Framework Core, SQL Server

KhumaloCraft E-Commerce Platform

- Developed and deployed an e-commerce platform with product, order, and admin functionality.
- Integrated Azure services for scalable cloud deployment and search capabilities.
- Designed database schema supporting users, products, and transactions.
- Tech: ASP.NET Core, Azure, SQL Database, Cognitive Search

Agri Energy Connect

- Built a platform connecting farmers with sustainable energy providers.
- Implemented authentication and role-based access using ASP.NET Identity.
- Developed dynamic UI features using JavaScript and AJAX for improved user interaction.
- Tech: ASP.NET Core MVC, C#, Entity Framework Core, SQLite
